

## Principles of Human Knowledge (Spanish Edition)

George Berkeley was an Irish Philosopher who is best known for putting forward the idea of subjective idealism. A Treatise Concerning the Principles of Human Knowledge is one of Berkeley's best known works and in it Berkeley expounds upon this idea of subjective idealism, which in other words is the idea that all of reality, as far as humans are concerned, is simply a construct of the way our brains perceive and according to Berkeley no other sense of reality matters beyond that which we perceive.
