

## The Power Bearer

How Norra obtained the Power and the extraordinary lengths she through to get rid herself of it. The greatest mage in the world reluctantly transfers his magical power to a sixteen year old girl just as he dies. It might seem like a wonderful blessing, but on the world of Polda, females have been cursed for centuries with the inability to perform magic. She has the power, but cant use it. Norra drags along a ghost, a diminutive wizard, a highwaywoman and sentient cloud along with her roommate from Miss Podingoodes Finishing School, as she escapes from wizards and mages, who are attracted to her power. She must flee for her life, yet the possibility exists for her to return to the Master Mages tower to transfer the power to another. First she must survive as they travel through hostile lands in order to even make the attempt. This is the second edition and contains slightly updated content to align it with the print edition.
