A Classic of Christian Apologetics

Orthodoxy by G. K. Chesterton (1908) is a book by G. K. Chesterton that has become a classic of Christian apologetics. Chesterton considered this book a companion to his other work, *Heretics*. In the book's preface, Chesterton states the purpose is to attempt an explanation, not of whether the Christian faith can be believed, but of how he personally has come to believe it. In it, Chesterton presents an original view of Christian religion. He sees it as the answer to natural human needs, the answer to a riddle in his own words, and not simply as an arbitrary truth received from somewhere outside the boundaries of human experience. The book was written when Chesterton was an Anglican. He converted to Catholicism 14 years later. The title, *Orthodoxy*, is meant to avoid such sectarian questions. The book is developed as an intellectual quest by a spiritually curious person. While looking for the meaning of life he finds truth that uniquely fulfills human needs. This is the truth revealed in Christianity. Chesterton likens this discovery to a man setting off from the south coast of England, journeying for many days, only to arrive at Brighton, the point he originally left from. He does not at first recognize it, and thinks he has discovered something new - only to find that it has been found by many before him. Such a man, he proposes, would see the wondrous place he grew up in with newly appreciative eyes. This is a common theme in Chesterton's works, and one which he gave fictional embodiment to in *Manalive*. It is also the way he describes his spiritual journey. He thought of himself as making a blueprint of what would be necessary in a religion, only to find that the structure had already been built and was standing in front of him - that structure is the Church.
