

## Combo: Anatomy & Physiology with Integrated Study Guide w/Connect Access Card with LearnSmart and LearnSmart Labs Access Card

Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, how they need it, so that your class time is more engaging and effective. Designed for an introductory, one-semester course, the scope, organization, writing style, depth of presentation, and pedagogical aspects of this text have been tailored to meet the needs of students preparing for a career in allied health. This text does not assume any prior science knowledge on the part of the student and effectively presents students with the fundamentals of anatomy and physiology. Its the only one-semester text available with a built-in study guide/workbook. A hallmark feature of this text is the authors presentation of A&P concepts that are accurate, but presented at a level that is appropriate for virtually all students. Stan Gunstream highlights the relationships between structure and function of body parts and the mechanisms of homeostasis. In addition, interrelationships of the organ systems are noted where appropriate and useful. Without the excessive detail of some of the longer A & P texts, students can better comprehend key critical concepts in each important area of study. Users who purchase Connect receive access to the full online ebook version of the textbook.
