

## Anarchism and Anarcho-Syndicalism

These major writings on the ideology and practice of anarchism have a special value in showing the Marxist position against anarchism. Marx and Engels center their attack upon the followers of Bakunin, while Lenin's writings are devoted largely to syndicalist and economist trends in the labor movement, and to sectarian and leftist tendencies in the Communist movement during and after the Russian revolution of 1917. This collection was originally published in the Soviet Union in 1972.
